

## Want to develop an Edtech Strategy for your school?

Contact the Outwood Edtech team today for free advice or staff training!

Outwood Grange Academies Trust are proud to be an Edtech Demonstrator Trust, supporting other schools in their Edtech Strategy.

We have spent the last six years mastering Google Workspace, and the best ways to deploy this vital tool into classrooms. All schools within the Outwood Family successfully use Google Workspace as the preferred tool for delivering our online curriculum offer, resource production, online learning and social communication.

We have built a team of 28 highly skilled Edtech Leaders who model our best practices and deliver training and support to staff within our schools. Our team can support the full roll-out of your digital strategy, from training staff to offering technical support, from EYFS through to Post 16.

Whatever your requirements, our Edtech Leaders are ready to share their knowledge to take your school to the next level for your online curriculum!
